** Attached is a list of all DOH School-Based Health Centers (existing and proposed.) Please note that we do not have funds to provide connectivity to all the SBHC's. We are currently working with the SBIRT project to identify 8-10 sites. When we finalize the list I will forward the information. We hope to have the final selection made this week. There are other school-based health centers that are NOT funded via DOH. We are in contact with those sites via technical assistance. We do not oversee/manage their operations. I do not have a contact list for those sites.
