

CHANGING LIVES WITH SMART LIVING TECHNOLOGIES

.....

Cognitively Accessible Technologies Used Directly by Individuals at Home, School, Work and in the Community for Smart Living

Smart Living Desktop

.....

The Smart Living Desktop opens up Windows computers for everyone, regardless of cognitive ability. Multiple components work within the clean, secure interface to provide the following functionality:

Picture & Audio Email

Spam-free email that opens up communication and access to messages, images, and other attached content without requiring ability to read or navigate menus

Web Browsing

Safe and ad-free web browsing, scalable as the user grows with the software

Endless Customization

.....

The Smart Living Desktop can be tailored to meet the needs and skill level of any user. Admin settings can be adjusted to provide a computing experience that grows with a person's ability and interests. Button names, images, sizes, and backgrounds can all be designed to meet individual preferences.

Video Modeling

AbleLink's Visual Impact software provides customizable step-by-step instruction. Content can be created on the Visual Impact mobile app and deployed through a shared organizational Learning Library

Media Player

Desktop-driven access to music, videos, pictures, and more - all with AbleLink's visual player
