The following pages have cases by County, Race/Ethnicity and Year

**During 2007 and 2008, the New Mexico STD Program conducted extensive quality assurance review of STD case investigations from 1999 through 2007. These QA activities have resulted in identifying hundreds of STD cases (mostly chlamydia and most from 2004-2006) that had not been entered into the STD database, hundreds of miscodes for Race/Ethnicity (mostly cases among Native American incorrectly coded as Other) and numerous incorrect ages and county of residence. These errors have been fixed. (See note below about errors that could not be corrected) As result, the numbers of cases on these tables will differ from what had been posted on this website prior to September 2008.**

**NOTE: Information for Cases from Santa Fe County for 2003 through 2005 are inaccurate. Data were not entered and have been lost. Thus, the numbers of cases for Santa Fe County in these tables are only a small proportion of the true number of cases. Please use these data with caution. Information for Native American Cases from McKinley County is missing from Gallup Indian Medical Center for 1999 through 2002. Thus, the numbers of cases for in McKinley County for these years is inaccurate. Please use these data with caution.**
