Footnotes

NOTE: Distribution of prevalent HIV and AIDS cases amongst the total Persons Living with HIV or AIDS in New Mexico is 42.4% and 57.6%, respectively.

NOTE: CNC means Can Not Calculate - population data is unavailable.

NOTE: Percentages across characteristics within a section of this table may not add to 100.0% as a result of rounding.

* All people who were newly diagnosed with Stage 1 through 3 HIV infection while residing in New Mexico during 2015; age 13 & older.

† All people newly or previously diagnosed with Stage 1 through 2 or Stage 3 HIV infection and residing in New Mexico during 2015; age 13 & older.

‡ Rates per 100,000 based on Bureau of Business and Economic Research Geospatial and Population Studies Program population estimates for 2015.

§ The large difference in total prevalent Stage 1 through 3 HIV infection frequencies reported the 2014 end-of-year report and this report (difference = -82) is attributed to the February 2016 address update project where the current addresses were updated for all persons with confirmed HIV infection and reported to the New Mexico HIV Surveillance & Epidemiology Program between 1983 and 2016; where a large number of persons were reclassified as no longer living in New Mexico.

¶ For new diagnoses, age at time of diagnosis. For persons living with HIV or AIDS, current age.

€ For new diagnoses, residence at time of diagnosis. For persons living with HIV or AIDS, current residence.

Cautions

N < 20: Rate calculations for small numbers may be statistically unreliable. Fluctuations in the associated rates may be due in part to statistical unreliability rather than true change.

Region: New Mexico Department of Health constructed new health regions in 2012. Regional comparison to previous years is not recommended. A map depicting New Mexico's Health Regions is available for download from the New Mexico Department of Health at <https://ibis.health.state.nm.us/view/docs/HealthRegions2012.pdf>.

Red "*"** - Indicates ≥ 20% positive change from previous year, for values > 20.

Green "++" - Indicates ≥ 20% negative change from previous year, for values > 20.
