

VACCINE BORROWING GUIDANCE

NM VFC Providers are expected to manage and maintain an adequate inventory of vaccine for both their VFC and insured patients

Planned borrowing of VFC vaccine, including the use of VFC vaccine as a replacement system for a provider's privately purchased vaccine, is not permitted.

NM VFC Program providers must ensure borrowing VFC vaccine will not prevent a VFC-eligible child from receiving a needed vaccination. Infrequent exchanging between VFC and State stock of a short-dated vaccine dose may be performed if the provider serves a small number of insured patients, the dose is one month from expiration, or the dose of vaccine cannot be used for the population it is intended for prior to the expiration date.

COMPLETE THIS FORM WHEN:

- ✓ A dose of VFC vaccine is administered to an insured child
- ✓ A dose of privately-purchased vaccine is administered to a VFC-eligible child
