

Reasons to Follow-Up if Your Baby Does Not Pass Newborn Hearing Screening

- ✓ As many as 3-4 babies in 1,000 have a significant hearing loss. Most of these are permanent hearing losses and hearing will not improve with age.
- ✓ Audiologists can provide hearing evaluations regardless of your child's age or stage of development.
- ✓ Early intervention services, especially when begun by 6 months of age, can make a significant difference in how well babies with a hearing loss learn language. Early intervention provides information, support, and services to help your child learn language, speech, and listening skills. Early intervention services are available throughout New Mexico and are provided free of charge to eligible children and their families.
- ✓ The fastest and most critical time for language development is between birth and 3 years of age. Babies and young children who can't hear well have a harder time learning language and learning to talk. Early identification of hearing loss in infants provides this valuable language learning time.
- ✓ Routine medical care seldom includes the hearing evaluation that could identify babies with a hearing loss. Your baby should see an audiologist experienced in testing infants and young children if your baby does not pass the newborn hearing screen.
- ✓ Babies who don't pass their newborn hearing screen because of fluid in their ear(s) may not have a permanent hearing loss, but they are more susceptible to ear infections.
- ✓ Even with good medical follow-up, 10% of preschoolers continue to have chronic ear problems during critical language development years. Children with early, recurrent ear problems are at risk for developing delays in language, listening, talking and academic skills.
- ✓ Children who have a hearing loss in only 1 ear have 10 times the risk for failing a grade in school.

Call your baby's doctor or local pediatric audiologist as soon as possible if your baby does not pass newborn hearing screening!

Your Baby's First Year Hearing, Understanding and Talking Checklist

Hearing and Understanding	Talking
<p style="text-align: center;">Birth to 3 Months</p> <p>Yes No</p> <p><input type="checkbox"/> <input type="checkbox"/> Startles to loud sounds</p> <p><input type="checkbox"/> <input type="checkbox"/> Smiles when spoken to</p> <p><input type="checkbox"/> <input type="checkbox"/> Recognizes your voice and quits crying</p> <p><input type="checkbox"/> <input type="checkbox"/> Increases or decreases sucking behavior in response to sound</p>	<p style="text-align: center;">Birth to 3 Months</p> <p>Yes No</p> <p><input type="checkbox"/> <input type="checkbox"/> Coos and makes pleasure sounds</p> <p><input type="checkbox"/> <input type="checkbox"/> Cries differently for different needs</p> <p><input type="checkbox"/> <input type="checkbox"/> Smiles when sees you</p>
