

**Provider Enrollment
Respondent/Topic Area/DDSD Response**

Public Respondent	Feedback	DDSD Response
Survey Monkey	Good information.	Thank you.
DRNM	The standards appear to be designed to force providers to comply with the new CMS settings rules yet there does not appear to be any plan to do the rate work necessary to ensure adequate provider compensation to carry out the requirements. Extensive rate work is required especially in rural areas to assure the state wide service requirement in the DD Waiver application is met.	Settings requirements are mandated by CMS. NM is planning a rate study; this plan is in approved waiver.
7/18/17 Forum	Re: State-Imposed Moratorium – too general	DDSD will provide additional information.
7/18/17 Forum	Re: Closure – add language about individual preference and how successful transition will be ensured	A Transition Chapter was created to ensure successful transitions
7/18/17 Forum	Provider Performance issues – consequences? – help families, and providers understand what happens next, and what they need to do – when provider obligations have not been met	Thank you for this suggestion. This information is not detailed in the standards. Please contact your local Regional Office for individual specific issues.
7/18/17 Forum	Pg. 1- duplication re CMS – is this overkill? Others thought it was good to have this restatement of CMS throughout the standards. Important to note providers who don't meet settings reqs will no longer be approved.	Providers have until 2022 to comply with the CMS HCBS Settings Requirements.
