CHANGING LIVES WITH
SMART LIVING TECHNOLOGIES

Cognitively Accessible Technologies Used Directly by Individuals at Home, School, Work and in the Community for Smart Living
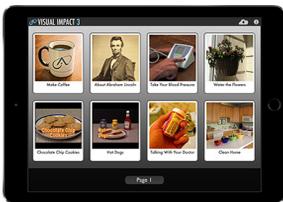

Smart Living Mobile Apps

The Smart Living Mobile apps work in tandem to provide seamless interaction between time-sensitive reminders and step-by-step instructions. A cloud-based Learning Library can also be deployed to share content for Visual Impact among multiple users.

AbleLink Endeavor

Increased independence requires that a person be able to keep on track with daily activities. Important reminders such as medication, bus schedules, and other details are presented in a cognitively accessible interface.

AbleLink Visual Impact

Visual Impact is for anyone who needs simple supports to perform daily tasks of all kinds. Household chores, work projects, and other content can all be accessed with a single button. Tasks created can be full video modeling, pictures with audio, or checklist-style instruction.
