Statement of intent to present technical evidence (continued)

B.4

[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]
[REDACTED]

Summary of presentation: [REDACTED] will share her personal story as a sexual assault survivor with a diagnosis of vaginismus and PTSD and spending a significant portion of her sexually active adulthood struggling with pain and accessing orgasm due to her trauma. After seeing countless specialists and being prescribed a range of ineffective treatments, she moved to California to have access to medical cannabis. Using cannabis, both topically and via inhalation, allowed her to both enjoy sex without pain and access orgasm reliably for the first time. [REDACTED] went on to [REDACTED] [REDACTED] where she helps women access orgasm and enjoy sex through the use of cannabis.

Estimated length of testimony: 5 minutes
