35 MCG EE		NORGESTIMATE 0.25 mg norgestimate / 35 mcg EE Brand Names: <u>Mili</u>, Estarylla, MonoNessa, Ortho-Cyclen, Previfem, Sprintec

Hormone contents in the oral contraceptive pills (OCPs) may include:

1. **Progestin:** two derivatives
 - a. **Estrane** (“Thin/Thyn” in the name) – Norethindrone is the active form.
 - b. **Gonane** (“Gest” in the name) – Levonorgestrel, Norgestimate (which active form is also levonorgestrel but has less androgenic activity)

2. **Estrogen:** ETHINYL ESTRADIOL (EE) – In this table, OCPs are listed in incremental EE dosage from zero to 35 mcg. Higher EE dose helps with **breakthrough bleeding and spotting in early cycle**.

OCPs with underlined names are Title X preferred brands.

Title X service sites that are unable to provide clients with access to a broad range of acceptable and effective medically approved family planning methods and services, must be able to provide a prescription to the client for their method of choice or referrals to another provider, as requested.
