Item	Description
<b>Source File Name</b>	<b>Output file for export</b>
<b>Frequency</b>	
<b>File Format</b>	Delimited
<b>Delimiter</b>	default is pipe symbol  if database field contains delimiter replace with space before exporting.
<b>Selection Criteria for Export</b>	<p>The Death Record Extract job is run against the reporting database and shall include all cases between the start and end date.</p> <p>The Refresh Death Report Extract job is used to update the Death Reporting database. The Refresh Death Report Extract job shall be dependent upon the use of start and end date parameters. If a start and end date is used, then the job shall include all cases between the start and end date and where the case status is registered or manually registered. If the start and end date are left blank, the job shall include only those cases where the Refresh Report Extract date on the identifiers page is null and where the case status is registered or manually registered.</p> <p>The Refresh Report Extract date shall be set to null if any of the items noted in Attachment L for the extract are amended.</p> <p>If a case is subsequently voided after being included in the reporting database, the case shall be deleted from the reporting database.</p> <p>PA Specific: If a start and end date is used, then the job shall include all cases between the start and end date. If the start and end date are left blank, the job shall include only those cases where the Refresh Report Extract date on the identifiers page is null. Includes Void, Abandoned, Registered and Unregistered cases. If a case is subsequently voided after being included in the reporting database, the case shall NOT be deleted from the reporting database.</p> <p>PA Specific: If a start and end date is used AND if the case changes status FROM or TO any of the following (Void, Abandoned, Registered) after the Refresh Report Extract date AND the STATUS change is between the start and end date the case will be included. If the start date and end date are left blank, AND if the case changes status FROM or TO any of the following (Void, Abandoned, Registered) after the Refresh Report Extract date, the case will be included.</p> <p>The Refresh Reporting extract date shall be set to null if any of the items noted in Attachment L for the extract are amended.</p>
<b>Sort Criteria for export</b>	
<b>Parameters</b>	
Death Record Extract	Start date (export only) manually keyed on job scheduler page
	End date (export only) manually keyed on job scheduler page
Refresh Death Report Extract	Start date manually keyed on job scheduler page
	End date manually keyed on job scheduler page
	Maximum Job Run Time in Minutes manually keyed on job scheduler page
	Ignore Reporting Extract Date and Re-Extract All manually keyed on job scheduler page
<b>Other associated processes</b>
